Brewery Management Systems

BREWERY MANAGEMENT

www.spasoft.ltd.uk
0845 2932521

A combination of modules integrated to build a complete system, flexible to work how you work whilst supplying the management reports required to run a successful brewery.

Gyles

The movement of Gyles between different containers is completed in one screen with a few clicks of the mouse. You can only fill empty containers and only with the recorded volume. An accurate list of stock by type or by container, including non-returnable units is available at the touch of a button. Full traceability of every Gyle and every container it used.

Customers

Keeping track of your customers, their contact details, their ordering history, their specific delivery requirements, all in one place. Increase sales using the telesales module, always opens with today's calls displaying the notes for each previous call, quick text inputs and call re-scheduler. Rapid order entry and straight to next call. Remote login supports home workers.

Orders

This has to be quick and easy, you can create an order at the click of a mouse in Customers or Telesales on all products; guest beers, casks, pins, bottle, non-returnables, miscellaneous and equipment. Check stock against orders in the system. When planning deliveries include collections from non-delivery customers in your dry routing.

Casks

Cask tracking module maintains an accurate record of all cask movements, including their contents, date out, where they went, how long they are out and when they come back. Every Invoice lists the serial number of each cask on premises. When a cask is scanned at the brewery it is returned to 'available' status. This is when the system can take into account failed deliveries and ullage, generating credit notes based on the invoice price and updates the duty calculation.

Accounts/Duty

Load your annual brew volume, and duty is automatically calculated as each invoice is raised. Check your duty summary when needed and at the end of each month print the duty report and the numbers are ready for HMRC.

The detail of every invoice and credit note can be exported to your accounts package. Manage receipts and monitor the account status whilst in telesales before you take an order.

Printer

The Zebra GK420t is built for ease of use and durability. It boasts the easiest ribbon loading system on the market along with:

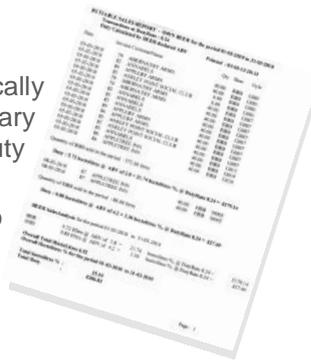

- Fast print speed
- Sleek and compact design

Scanner

Honeywell's Voyager 1202g single-line laser scanner incorporates the freedom of Bluetooth wireless technology and a long life user-replaceable battery.

- Long life, user replaceable battery
- Paging - find me facility

Brewery Management System

- ✓ Cask Management
- ✓ Brew Management
- ✓ Customers/Sales
- ✓ Accounts Duty

Cask Management

- ✓ Cask Tracking
- ✓ Gyle Recording
- ✓ Order Processing

Cask Tracking

- ✓ Cask Status
- ✓ Cask Location
- ✓ Cask Statements

Brew Production

- ✓ Recipe Management
- ✓ OG/Temp Profiles
- ✓ Stock Control
- ✓ Traceability

Customers/Sales

- ✓ Sales Order Processing
- ✓ Telesales
- ✓ Price Books/Discounts
- ✓ Invoicing

Accounts/Duty

- ✓ Duty Summary/Detail
- ✓ IDS records
- ✓ Accounts Interface
- ✓ Sage, Xero & more...

Bespoke Modules

- ✓ Intelligent Scanners
- ✓ Accounts Interface
- ✓ Report Generation

Technical Support

- ✓ Business hours - Phone
- ✓ 24 Hrs Online
- ✓ Onsite Training

Price (Includes installation, training, cask labels and initial racking/delivery labels) **£6,000.00**

£6,000.00

SIBA members special offer

(Includes installation, training, cask labels and initial racking/delivery labels)

£4,500.00
